J.-L. Verdier

Volume 55
1987
Duke University Press

CONTENTS

Volume 55, 1987

ADDINGTON, SUSAN L. Equivariant holomorphic maps of symmetric domains 65

BAYER, DAVID, AND MICHAEL STILLMAN. A theorem on refining division orders by the reverse lexicographic order 321

BEAUVILLE, A., ET J.-Y. MÉRINDOL. Sections hyperplanes des surfaces $K3$ 873

BOMAN, JAN, AND ERIC TODD QUINTO. Support theorems for real-analytic radon transforms 943

BRUNA, JOAQUIM, AND JOSEP M. BURGUÉS. Holomorphic approximation and estimates for the ∂-equation on strictly pseudoconvex nonsmooth domains 539

BUMP, DANIEL, AND JEFFREY HOFFSTEIN. On Shimura's correspondence . . 661

BURGUÉS, JOSEP M., AND JOAQUIM BRUNA. Holomorphic approximation and estimates for the ∂-equation on strictly pseudoconvex nonsmooth domains 539

CERCIGNANI, CARLO, REINHARD ILLNER, AND MARVIN SHINBROT. A boundary value problem for discrete-velocity models 889

CHANILLO, SAGUN, AND MICHAEL CHRIST. Weak (1, 1) bounds for oscillatory singular intervals 141

CHIERCHIA, L., N. ERCOLANI, AND D. MCLAUGHLIN. On the weak limit of rapidly oscillating waves 759

CHRIST, MICHAEL, AND SAGUN CHANILLO. Weak (1, 1) bounds for oscillatory singular intervals 141

CILIBERTO, CIRO. On rationally determined line bundles on a family of projective curves with general moduli 909

CLOZEL, L. On the cuspidal cohomology of arithmetic subgroups of $SL(2n)$ and the first Betti number of arithmetic 3-manifolds 475

CROKE, CHRISTOPHER B. Lower bounds on the energy of maps 901

DAVIS, MICHAEL W. The homology of a space on which a reflection group acts 97

_____. Some aspherical manifolds 105

DEVANEY, R. L., AND L. R. GOLDBERG. Uniformization of attracting basins for exponential maps 253

EFRAT, ISAAC. Determinants of Laplacians and a second limit formula in $GL(3)$ 349

EPSTEIN, CHARLES L. Asymptotics for closed geodesics in a homology class, the finite volume case 717

ERCOLANI, N., M. G. FOREST, D. W. MCLAUGHLIN, AND R. MONTGOMERY. Hamiltonian structure for the modulation equations of a sine-Gordon wavetrain 949

ERCOLANI, N., L. CHIERCHIA, AND D. MCLAUGHLIN. On the weak limit of rapidly oscillating waves 759

FATHI, ALBERT. The Poisson bracket on the space of measured foliations on a surface 693

FOREST, M. G., N. ERCOLANI, D. W. MCLAUGHLIN, AND R. MONTGOMERY. Hamiltonian structure for the modulation equations of a sine-Gordon wavetrain 949

GILLET, HENRI G., AND WILLIAM MESSING. Cycle classes and Riemann–Roch for crystalline cohomology 501

GOLDBERG, L. R., AND R. L. DEVANEY. Uniformization of attracting basins for exponential maps 253

GUTKIN, EUGENE. Operator calculi associated with reflection groups 1

HEJHAL, DENNIS A. On Schottky and Koebe-like uniformizations 267

HOFFSTEIN, JEFFREY, AND DANIEL BUMP. On Shimura's correspondence . . 661

HSIANG, WU–YI. On the construction of infinitely many congruence classes of imbedded closed minimal hypersurfaces in $S^n(1)$ for all $n \geqslant 3$ 361

ILLNER, REINHARD, CARLO CERCIGNANI, AND MARVIN SHINBROT. A boundary value problem for discrete-velocity models 889

ISHII, HITOSHI. Perron's method for Hamilton–Jacobi equations 369

KATO, KAZUYA, WITH THE COLLABORATION OF TAKESHI SAITO. Vanishing cycles, ramification of valuations, and class field theory 629

KATO, TOSIO, AND GUSTAVO PONCE. On nonstationary flows of viscous and ideal fluids in $L^p_x(\mathbb{R}^2)$ 487

KATZ, MIKHAIL. A note on hyperspherical manifolds of positive curvature and geometric contractibility 839

KATZ, SHELDON. Hodge numbers of linked surfaces in $\mathbb{P}^4$ 89

KENIG, C. E., A. RUIZ, AND C. D. SOGGE. Uniform Sobolev inequalities and unique continuation for second order constant coefficient differential operators 329

LANGE, HERBERT. Abelian varieties with several principal polarizations . . . 617

LANGEVIN, R., G. LEVITT, AND H. ROSENBERG. Complete minimal surfaces with long line boundaries 985

LAZARSFELD, ROBERT. A sharp Castelnuovo bound for smooth surfaces . . . 423

LEVITT, G., R. LANGEVIN, AND H. ROSENBERG. Complete minimal surfaces with long line boundaries 985

MCLAUGHLIN, D. W., N. ERCOLANI, M. G. FOREST, AND R. MONTGOMERY. Hamiltonian structure for the modulation equations of a sine-Gordon wavetrain 949

MCLAUGHLIN, D., L. CHIERCHIA, AND N. ERCOLANI. On the weak limit of rapidly oscillating waves 759

MÉRINDOL, J.-Y., ET A. BEAUVILLE. Sections hyperplanes des surfaces $K3$ 873

MESSING, WILLIAM, AND HENRI G. GILLET. Cycle classes and Riemann–Roch for crystalline cohomology 501

MONTGOMERY, R., N. ERCOLANI, M. G. FOREST, AND D. W. MCLAUGHLIN. Hamiltonian structure for the modulation equations of a sine-Gordon wavetrain 949

MUDER, DOUGLAS J. Concerning a conjecture of Colliot–Thélène and Sansuc 51

PHILLIPS, RALPH, AND PETER SARNAK. Geodesics in homology classes 287

PONCE, GUSTAVO, AND TOSIO KATO. On nonstationary flows of viscous and ideal fluids in $L^p_x(\mathbf{R}^2)$ 487

QUINTO, ERIC TODD, AND JAN BOMAN. Support theorems for real-analytic radon transforms 943

ROHLFS, JÜRGEN, AND BIRGIT SPEH. On limit multiplicities of representations with cohomology in the cuspidal spectrum 199

ROSENBERG, H., R. LANGEVIN, AND G. LEVITT. Complete minimal surfaces with long line boundaries 985

ROSENBERG, JONATHAN, AND CLAUDE SCHOCHET. The Künneth theorem and the universal coefficient theorem for Kasparov's generalized K-functor 431

RUIZ, A., C. E. KENIG, AND C. D. SOGGE. Uniform Sobolev inequalities and unique continuation for second order constant coefficient differential operators 329

SAITO, TAKESHI, IN COLLABORATION WITH KAZUYA KATO. Vanishing cycles, ramification of valuations, and class field theory 629

SARNAK, PETER, AND RALPH PHILLIPS. Geodesics in homology classes 287

SCHOCHET, CLAUDE, AND JONATHAN ROSENBERG. The Künneth theorem and the universal coefficient theorem for Kasparov's generalized K-functor 431

SHIMURA, GORO. On Hilbert modular forms of half-integral weight 765

SHINBROT, MARVIN, CARLO CERCIGNANI, AND REINHARD ILLNER. A boundary value problem for discrete-velocity models 889

SIBONY, NESSIM. Une classe de domaines pseudoconvexes 299

SIU, YUM–TONG. Defect relations for holomorphic maps between spaces of different dimensions 213

SJÖLIN, PER. Regularity of solutions to the Schrödinger equation 699

SOGGE, C. D., C. E. KENIG, AND A. RUIZ. Uniform Sobolev inequalities and unique continuation for second order constant coefficient differential operators 329

SPEH, BIRGIT, AND JÜRGEN ROHLFS. On limit multiplicities of representations with cohomology in the cuspidal spectrum 199

STILLMAN, MICHAEL, AND DAVID BAYER. A theorem on refining division orders by the reverse lexicographic order 321

TADIĆ, MARKO. Topology of unitary dual of nonarchimedean $GL(n)$ 385

VARDI, ILAN. A relation between Dedekind sums and Kloosterman sums .. 189

VERDERA, JOAN. C^m approximations by solutions of elliptic equations, and Calderón–Zygmund operators 157

WAHL, JONATHAN M. The Jacobian algebra of a graded Gorenstein singularity 843

WILSON, J. MICHAEL. A sharp inequality for the square function 879

_____. Weighted inequalities for the dyadic square function without dyadic A_∞ 19

XIAO, GANG. Irregularity of surfaces with a linear pencil 597

ZELDITCH, STEVEN. Uniform distribution of eigenfunctions on compact hyperbolic surfaces 919

ZUCKER, STEVEN. The Hodge structures on the intersection homology of varieties with isolated singularities 603
